

F-2013-00151 - Surrogacy treatments and information between 2007 and 2012

04 July 2013

Summary of request

The Authority was asked for the number of treatments in the UK involving surrogacy and the resulting births between 2007 and 2012, as well as a list of centres that have been involved in surrogacy arrangements.

HFEA response

Please find this data in the table below. Please note that the data is correct as of 03/07/2013 based on forms submitted by licensed clinics indicating that the treatment was a surrogacy. It is possible that these numbers could change in the future if the data reported to us by the sector is amended and as we make improvements to our own database's integrity.
